

Pasula Ajay Kumar

ajaynani2514@gmail.com | +91-7330903730 | linkedin | github | Leetcode | Portfolio

Education

- SR University**, Bachelor of Technology in Computer Science Nov 2023 – Apr 2027
- GPA: 8.7/10.0
 - **Coursework:** Data Structures & Algorithms, Operating Systems, Computer Networks, Database Systems, Machine Learning

Professional Experience

- Generative AI Intern, AICTE – Virtual Internship** July 2024 – Sep 2024
- Gained hands-on experience in **Generative AI, machine learning models, and prompt engineering**.
 - Built AI-driven solutions demonstrating intelligent automation and real-world data processing.
 - Explored applications including text generation, data analysis, and model evaluation.
- Web Development Intern - Codsoft** Nov 2024-Dec 2024
- Constructed a personal portfolio showcasing web development skills, achieving 500+ unique visits in the first month through strategic SEO implementation and cross-platform promotion, enhancing personal brand visibility.
 - Applied **UI/UX best practices** (Flexbox, Grid, Tailwind) to improve engagement and reduce bounce rate by **30%**. Gained hands-on experience with **debugging tools, version control (Git)**.

Projects

- AI Interview Coach – AI-Powered Interview Preparation Platform** [Live] | [GitHub] Jan 2026 - Mar 2026
- Developed an AI-powered interview preparation platform that generates interview questions, evaluates user responses, and provides personalized feedback to improve technical and behavioral interview performance.
 - Built and deployed a full-stack application integrating frontend interfaces with backend APIs to simulate real interview scenarios, manage interview sessions, and deliver real-time feedback.
- Student Performance Prediction Web Application** [Live] | [GitHub] Feb 2025 - April 2025
- Built a machine learning web application using Flask and Scikit-learn to predict student academic performance based on inputs such as study time, parental education, and previous scores.
 - Implemented data preprocessing, model training pipelines, and an interactive web interface, deploying the application on Render for real-time prediction through a browser.
- AI Deep Research Agent** Jan 2026 - Apr 2026
- Built: A production-level AI Deep Research Agent using LangGraph that performs multi-step reasoning (understanding, research, and report generation) to handle complex queries intelligently.
 - Deployed: Built a full-stack system with React frontend and Node.js proxy server, integrating GROQ and Tavily APIs for real-time data retrieval. Resolved CORS and API authentication issues, ensuring robustness.

Technical Skills

- **Programming:** Java | Python
- **Databases:** SQL | MongoDB
- **Frameworks:** Flask | Power BI
- **Tools:** Render (PaaS), VS Code
- **Web:** HTML | CSS | JavaScript | TypeScript | React
- **Source & Version Control:** Git | GitHub
- **Coursework:** DSA | Operating System | DBMS
- **Other Skills:** Data Analysis | Machine Learning | Data Science

Certifications

Certified Azure Fundamentals – Microsoft, Sep 2025
Cloud Infrastructure 2025 Certified AI Foundations Associate – Oracle, Aug 2025
Artificial Intelligence Fundamentals – IBM SkillsBuild, Aug 2025
Cloud Foundations –Academy Graduate, Oct 2025
